So a new year has started again. With the start of the new year, we are introducing some new faces to the all-familiar scene that is Fishwrap. The new editors are not nice, they are not interesting, and they really don’t care what you think about this newsletter. We were once told by a wise (read: senseless) senior engineering student that they only way to fully get to do what you want and not care about what people think is to control the media. By being on top (of a bi-weekly 8 page newsletter...Conrad Black, here we come) we get to do whatever we want. Read on, for this is our production. We hope you enjoy it - but if you don’t, that doesn’t really bother us either!

-Hodgie and Rudeboy, The Editors-

This is a humorous publication. In it, we make fun of people and laugh at funny things that happen. Please don’t take these things personally. We also address some serious issues. Common sense should be able to guide you to see which is which. Thanks.
