send all submissions to essacom@uvic.ca. really, come on now. Don't be lazy. What would your mama say?
On Friday 7th, 2015 as per ancient tradition, UBC Vancouver invited the University of Victoria out for a cup run. When a cup run is called, the school called is asked to bring as many people as they can to the other school to join in festive cheer. However, there is a catch: You only have 6 hours! When called at 2pm UVic made it to UBC Vancouver in just under 5.89 hours! Success! Your President, Tim Erdmer, took the opportunity to share with UBC all the pride of UVic through activities such as: Dancing, singing, storytelling, smiling, pointing at things, and most importantly, by laughing. We were then invited to join the UBC Engineers at their 96th annual Engineer’s Ball. Delicious dinner was served and the winners of their E-Week were announced. One of the more notable winners was the first year students in the film festival challenge. Of course, it isn’t too hard to win when the undeclared first years get a chance to rip on ALL of the departments and present it in a Game of Thrones style.
“You gotta heat it up to eat it up.”

UVIC ENGINEERS BEGIN TO TWITCH

"YES, IT’S UNTREATABLE, BUT IT’S FOR A GOOD CAUSE”, SAYS DIR. CHARITY

This term the UVic Engineering Student Society has began new ventures in philanthropy here on campus. From Friday February 20th 6:00pm - February 21th 6:00pm the ESS will be hosting a 24 hour Charity Game Stream in the ECS 2nd floor lobby. All proceeds go toward Child’s Play - a charity geared toward improving the lives of hospitalized children by means of games and toys. In the 24 hour duration, Engineering students will be playing games ranging from Castle Crashers to Cards against Humanity which will be stream live to an audience of donators in hope to raise as much money as possible. Anyone (specifically you [yes, you!]) is encouraged to come out and play [see the ESS GameStream page for details], watch, and hopefully donate. Gamers with any range of gaming skill are welcome because people are paying good money to see you kick ass - or produce some laughs from you being tea-bagged in Halo. People coming out are highly encouraged to bring their own hardware (because we aren’t made of PC’s bruh) and unique games (bonus points for obscure stuff that hasn’t been played since the early 2000’s and came out of a box of Corn Pops).

Please visit our Twitch at http://www.twitch.tv/UvicESS and Donate Donate DONATE!

Gosh golly, we’re already some 45-ish days into this term, and we haven’t introduced the various members of the ESS Executive! So we’re doing that now, look.

[1.] Tim Erdmer, President

Meet Tim Erdmer, pianist, debonaire, corn-bread fanatic, amateur notary public, and, since his bloodless January coup, our new President. Tim represents the latest in cat-based stem cell technology. Hailing from the Naval Research Lab in Norfolk, VA, our new president was built with one purpose in mind: business. When he’s not disarming terrorists with his smile, Tim privately enjoys drinking copious quantities of water, the amount which would cause most people to ask, “why is this happening to me? Why did karma show me these unholy sights?” You’d think it’s unhealthy, but it’s not.
“You gotta heat it up to eat it up.”

Feb, 20, 2015 The Randyman Cometh

[2.] Brandon Hart, Vice-President, Academic

When Brandon was a young boy his father took him to the city and there he saw a marching band and decided to join the black parade, have you wondered how a USB feels on your scalp? “With another hop and a bound there came into view a man, or so it seemed. At any rate he was too large and heavy for a hobbit, if not quite tall enough for one of the Big People, though he made noise enough for one.” –Mitch Cross, upon meeting Brandon

[3.] Mitchell ‘Crass’ Cross, Vice-President, External

Before he was a young boy, Mitchell Cross, your darling VP External, had to congeal into being from a vat of primordial essence also known as the grease trap dumpster behind a McDonalds. In his spare time (JKs, he’s in engineering), he enjoys the exhilarating pursuits of getting uncomfortably turnt up, mobbing the locker rooms of professional sports teams, and the design of the perfect dry rib recipe. He also likes long walks on the 2nd floor of the library, and watching his own belly button. Mitchell is always down for an iced lolly or a bag of fizzing whizzbees. Don’t be a stranger!

[4.] Darren Gervais-Harrison, Vice-President, Finance

While Darren Gervais-Harrison has been on this earth for the past quarter century, his beard has existed since the beginning of time. Formed during the big bang, Darren’s beard first floated throughout space free from time and all matter until around 5000BC, where it crashed to earth like some hairy comet, burying itself deep into the ground, possibly lost forever. From there it was discovered by a simple group of tribesmen, to which it latched itself onto their faces like that one scene in Alien and formed the nomadic group we know as the Vikings today. Darren’s beard was one of the first true explorers of North America, giving the Vikings the strength to fight all the sea monsters and I’m sure a bunch of....

[5.] Josh Ewart, Director of Events

...other messed up stuff out on the ocean. Once in Canada, Darren’s beard parted itself from the host and eventually blew wisply on the breeze tumbleweed style for many years until it made its way over to North Bay Ontario where it latched onto a small child. That child would be the babe Darren Gervais-Harrison and eventually would go on to grow into his beard and gain back the strength of the Vikings and probably be able to shoot flames from his eyes if he concentrated right. Since then, Darren has kept the beard under control and works as the humble VP of Finance at the ESS, and while his eyes can melt hearts; do not underestimate the power that hides beneath his nose. (SORRY JOSH)
[6.] Graeme Bates, Director of Services

AKA “Mini”: Raised by a pack of wolves in a Chinese forest, Graeme went on to be a German U-boat captain in WW2. Being a Time Lord, he has the ability to travel through time and went to colonize Mars in the year 2050. Bored with being ruler of Mars, he decided that he would travel to the now, to blend in with people looking his age in University. Here to get a degree in Software Engineering, he’s your current Director of Services. Better see him quickly before he travels to the future and helps to colonize a new solar system!

[7.] Michael Funk, Director of Corp. Relations

Michael Funk is not a man, but an idea; an algorithm made by the combined powers of the Illuminati, Masons, the Friars Club, Kanye West, the NSA, CIA, FBI, Homeland Security, 2Pac and Biggie. His purpose was originally the systematic takeover of the First World, but was quickly re-purposed to make emojis and the term "bruh" popular to an already seemingly borderline remedial demographic of swaglords and twitter bunnies. A portion of his life was spent in French Canada which was questionable to say the least. He now carries out his days in a small society of engineering socialites who spend their time complaining about Python and the exorbitantly high price of alcohol in BC. They put him to work nailing beer-stained t-shirts to walls and welding kegs together for the amusement factor alone.

[8./9.] Alex Laing + Colton Hyland, Directors of Communications (that’s us)

Colton Hyland, aka “Too-Cool for Skule”, originates from the cold, hipster city of Yelizovo, a semi-autonomous city in Kamchatka, Russia known for its moonshine, alien abductions and gulags. He was born into poverty but quickly built up an empire made of street urchin thugs and took over the majority of the Russian army before making a break for the west and what some call freedom. Since arriving Colton has worn a lot of scarves, developed a toenail fetish and had seven hairs cut. He can be heard be-

Alexander is a swag meister. He grew up in Compton on the streets with 50 cent but then followed his heart to the engineering world. He spends his days picking flowers making daisy chains and dreaming of his past thug life. He wishes to pursue a career in basket weaving and horse back riding, but not until he makes tubes and wires like a boss.
“You gotta heat it up to eat it up.”

TUBES & WIRES

Feb, 20, 2015

[10.] Jordan Vlieg, Director of IT

Jordan comes from a long line of bankers going back to the year 1618. In that year the Nederlandsche Genootschap van Nieuwe Guildijbautens (NGNG), headed by his great-great-great-great-great-great-grandfather Henkerhonk Vlieg, conquered the island of Aceh for King Willem VI of Oranje. Subsequently they found large quantities of precious memes which the native Aceh tribes had stockpiled over thousands of years, and became filthy rich. 400 years later, Jordan has broken away from his family and gone into IT instead, because “the bitcoin game ridiculous”.

[11.] Alex Wadey, Director of Sport

Wadey does sports and goes ham like a mother hubbard. You will recognize him approaching you by a faint chugging sound and his prized brass whistle, which he sounds whenever he goes through a doorway, as if he’s a train. He can go for days without eating anything except salted ham. #porksweats Before he knew what the ESS was, Wadey was working on a mixtape with Pharrell and the president of Comcast, but then he realized that you can gain a lot more street cred by hanging out in ELW 206 and browsing Reddit all day. God bless.

[12.] Eric Power, Director of Student Relations

Then out spake brave Powers, the captain of the frosh:

“To every first-year at this school we must bring drinks and nosh.
And how else shall we welcome them, but sharing frosty beers
With their fellow upperclassmen from the UVic Engineers?”

Eric’s a scholar and a poet. He wrote that poem. About himself.

[13.] Micah Berghuis, Secretary

A talented actor, comedian and writer, Micah has come a long way from doing stand-up comedy as a teen. He was born in Belarus, to Olga, a social worker, and Vladimir. He attended a private school in Nepal with the monks. At 18, he went on a spiritual adventure to the Amazon rainforest where he decided to begin a transformation into a plant. He learned how to photosynthesize and chose to become the ESS secretary where the main job is watering the plant. This would be the perfect position to complete his transformation. So next time you see the plant in the ESS office make sure you say hi to Micah!
Leigh brings a variety of charity skills to the table. Having been raised by great white sharks in the frosty tundra of the Siberian wilderness, she is fluent in the languages of wolves, polar bears, moose, and of course honeybadgers. After defeating the alpha male and starting her own pack at the age of 3, she went on to become the youngest person ever to hunt a grizzly using only her teeth, taking down 42 of Putin’s elite squad of security bears. Despite her rough upbringing Leigh dreams of one day becoming the chief of propaganda for the US government and settling down with a family. Leigh can usually be found sobbing in the corner of the ESS office having been put on a time out by Tim Erdmer.

Jason likes the Seahawks. We wish him well.

Unsolved Questions: Why did our Dir. Corp order 500 business cards for the ESS, and put his name on the back of every one?

FYI: HOW TO TAKE MIDTERMS, IF YOU ARE UNSURE

Unsure of what to do when taking a test/midterm/ final? Here’s a list of suggested activities!

- Do keep your phone ringer at max volume. Everyone wants to hear your alarms and notifications! You’re important, let everyone know.

- Do sniffle. Don’t bring kleenex. It’s not like anyone is trying to pay attention anyway.

- Talk. It’s a great way to let the invigilator know you’re not cheating!

- Stare at other students’ papers. Nobody wants to know how you understand material right? It’s just the answer that matters. Screw the future people. Everyone else that studied their asses off won’t mind you looking at their papers!

- Leave the room randomly. Don’t ask, just leave. It’s not like there’s anything important going on anyways.

- Since you’re going to be leaving, you might as well sit in the middle of the row. Interrupt AS MANY PEOPLE AS POSSIBLE. You don’t know what you’re doing, so why should anyone else be allowed to think?

- Eat loud food. People love hearing someone chew chips and carrots!

- Tap/make noises. You’re thinking, let other people know!

Oh and of course, keep doing these no matter what other students or invigilators say. You’re getting the best mark, no matter what right? The curve only gets better if EVERYONE does poorly!

- Anonymous
The snap contest is always on. The game this week is WEAK. Prove us better @ ‘fishwrap’.
hexadecimal sudoku

I’m constantly pushing for new records on how fast I can finish this damn paper. Today, I’m aiming to be done by 10 PM. Then, I’ll go home and eat sausages in the style of my ancestors. If you can finish this by next week, we have slushies for you.

QUOTES FROM AROUND ENGINEERING

“You want to use bigger and bigger coins, so a dime, then a quarter, then a loonie, then, you know, the bear.” - Min Tsao, STAT 260

“What can we put in Graeme’s mouth?” - Micah Berghuis

“Oh yeah, my dad had that.”

“Autism?” - Anon., talking about herpes

Unsolved Questions: Why don’t our Charity Co-ordinators want to be in the “Meet the Exec” section? They’re beautiful people.
